MTA Mobility and Device Fundamentals (98-368) 2020

Product Id (632439)

5h 36m 32s | Computer Fundamentals | 5 module(s) | All

LearnKey's MTA Mobility and Device Fundamentals (98-368) course covers Windows device management, both from an end-user administrative perspective and from a network management perspective. Specific topics include: operating system configurations, installing and updating client systems, managing applications, managing files and folders, managing devices, and understanding operating system maintenance. This course will help students get ready to pass the 98-368 exam and help with employability prospects for any job requiring Windows and Windows device support and management.

A Certificate of Completion can be earned by scoring 80% or better on all Post-Assessments. A Badge can be earned by scoring 90% or better on all Post-Assessments.
